

Air Pollution Control system

Dust Collector

Industrial Products

Dust Collector

Dust collector, also known as a bag filter, is a device for collecting dust in many forms of air pollution. With the efficiency of dust filtering up to 99% can be used continuously for a long time By the filter bag cleaning system inside the machine Can eliminate pollutants in the air perfectly And collecting that dust in proportion Suitable for all types of industries

Dust collector is widely used In many industries Such as rice mills, cement mills, tile industries, lathing, polishing, as well as all kinds of work that causes air pollution. However, the company does not stop developing and bringing new technology Put in to be a part of the machinery that is always ahead

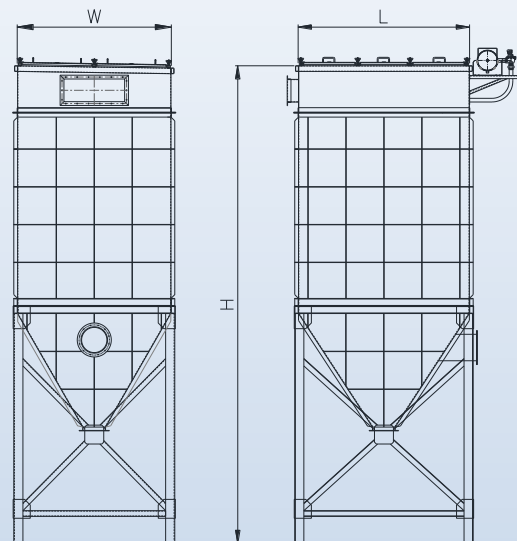

Special Features

- Suitable for collecting very fine details and dust such as cement plants or others at
- Is a medium vacuum cleaner
- You can choose the type of filter bag suitable for the type of dust.
- With Auto Pulse Jet (automatic bag cleaning)
- Can signal the operation of the story with the PLC system

Dust Collector

Specification Of Product

Model	Air flow	Filter No. (Pcs.)	Filter Area (m ²)	Dimensions		
	(m ³ / min)			Width (m.m)	Length (m.m)	Height (m.m)
RVDC – 20-2.0	30 - 35	20	19	1100	1330	5800
RVDC – 20-2.5	40 - 45	20	24	1100	1330	6300
RVDC – 30-2.0	50 - 55	30	28	1330	1560	5800
RVDC – 30-2.5	60 - 65	30	35	1330	1560	6300
RVDC – 36-2.0	60 - 65	36	34	1560	1560	5800
RVDC – 36-2.5	75 - 80	36	42	1560	1560	6300
RVDC – 40-2.0	65 - 70	40	38	1330	2020	5800
RVDC – 40-2.5	80 - 85	40	47	1330	2020	6300
RVDC – 42-2.0	70 - 75	42	40	1560	1790	5800
RVDC – 42-2.5	85 - 90	42	49	1560	1790	6300
RVDC – 48-2.0	75 - 80	48	45	1560	2020	5800
RVDC – 48-2.5	95 - 100	48	57	1560	2020	6300
RVDC – 56-2.0	90 - 95	56	53	1790	2020	5800
RVDC – 56-2.5	115 - 120	56	66	1790	2020	6300
